

MAHAMMUD HASSAN LIMON

Portfolio: developwithlimon.com | [+880 1887604100](tel:+8801887604100) | [@linkedin.com/in/mhlimon](https://www.linkedin.com/in/mhlimon)

SUMMARY

Full Stack Developer focused on fast coding, scalable and secure applications, clean code, performance optimization, and quick learning. Passionate about building real-world solutions and turning ideas into reality with my best technical skills.

TOOLS & TECHNOLOGIES

- **Languages** : Javascript, Typescript
- **Backend** : Node.js, Express.js, GraphQL, Nest.js
- **Databases** : MongoDB, MySQL, Mongoose, Prisma, Redis
- **Frontend** : React.js, Next.js, Redux, Tailwind, UI libraries
- **Real-Time** : Socket.IO
- **Animation** : Gsap, Three.js
- **Tools & DevOps**: Git & Github, Linux, VPS, CDN

PROFESSIONAL EXPERIENCE

AB seed Company

Nov 2025 – Jan 2026

Full-Stack Developer

Business Development

- **Contributed** to project architecture planning, structuring backend modules and defining scalable API patterns for business and logistics systems.
- **Designed** and implemented fully responsive frontend interfaces with a strong focus on mobile-first design and cross-device compatibility.
- **Optimized** REST API performance, improving response time by approximately 40% through backend refactoring and efficient query handling.
- **Developed** secure authentication and authorization mechanisms using JWT-based authentication.
- **Integrated** Socket.io to enable real-time updates and improve user interaction within the system.
- **Collaborated** with stakeholders to translate business requirements into structured technical solutions.

PERSONAL PROJECTS

Ekomart E-com

[GitHub](#)

Tech Stack: Reactjs, Expressjs, socket.io, MongoDB, Mongoose, Cloudinary

- Implemented secure **authentication system with JWT-based login and Google OAuth integration.**
- Developed an admin dashboard for product upload, update, and inventory management
- Built complete cart and checkout system supporting both **manual payment and Stripe online payment integration**
- Structured backend using **RESTful APIs with proper route-controller separation.**
- Designed advanced product search and filtering functionality to improve user experience.
- Here my portfolio you can see this project => <https://developwithlimon.pages.dev>

Mili-chat app - A realtime chatting application

[GitHub](#)

Tech Stack: Nextjs, Expressjs, GraphQL, socket.io, MongoDB, Mongoose, Cloudinary

- Implemented secure authentication system using **Access Token + Refresh Token strategy.**
- Integrated **Google and Facebook OAuth login** for seamless third-party authentication.
- Designed and developed user profile system with customizable privacy controls.
- Built **real-time 1-to-1 and group chat system.**
- Implemented **live online/offline status** tracking.
- Enabled users to upload and manage posts and stories.
- Implemented protected routes and role-based access control.
- Developed real-time notification system for user activities.
- Structured backend using modular architecture with proper route, controller, and middleware separation.
