SUMMARY

Full Stack Developer focused on building scalable web applications using modern JavaScript frameworks and backend technologies. Experienced in React, Node.js, Express, MongoDB, and SQL-based systems. Passionate about writing clean, productionready code, API development, and building end-to-end features. Currently expanding into AI-powered development using LLM APIs (OpenAI, Gemini, Claude), LangChain, and vector databases like Pinecone and ChromaDB. Actively using AI-assisted development tools (ChatGPT, Copilot) to improve development speed and debugging efficiency while maintaining engineering quality.

TOOLS & TECHNOLOGIES

- Languages : Javascript(ES6+), Typescript, Python(Basic)
- Backend : Node.js, Express.js, REST APIs, GraphQL, Nest.js
- Frontend : HTML5, CSS3, React.js, Next.js, Redux, Tailwind, UI libraries
- Databases : MongoDB, MySQL, PostgreSQL , Redis, Mongoose, Prisma
- Real-Time : Socket.IO, WebRTC
- Animation : Gsap, Threejs, Framer Motion
- Tools & DevOps: Unit/Jest testing, Git, GitHub, Postman, Docker (basic), Linux, CI/CD pipeline , Stripe Integration

PROFESSIONAL EXPERIENCE

AB seed Company | Dhaka

Nov 2025 – Jan 2026

Full Stack Developer

- Implemented RESTful APIs using Node.js with improved response performance by ~46%.
- Developed authentication system using JWT and Google OAuth.
- Worked on full-stack SaaS features with focus on scalability and maintainability.
- Participated in code reviews and contributed to system-level debugging.
- Designed responsive UI with React and Tailwind CSS .
- Built scalable APIs ensuring reliability under concurrent usage.
- Collaborated with cross-functional teams to deliver user-focused features.

Production Client Project – MERN E-commerce Platform

[GitHub](#)

Deluxe X Deal BD

Full Stack (Client Project)

- Built a full-stack e-commerce platform using React, Next.js, Node.js, Express, MongoDB.
- Designed and implemented complete product management, cart, and checkout system.
- Deployed application on Ubuntu VPS (Hostinger) with production-ready configuration.
- Configured server environment, domain setup, and deployment pipeline.
- Integrated secure REST APIs with proper backend architecture and database design.
- Optimized backend queries and implemented caching, improving overall website performance by 80%.
- Successfully conducted load testing for 10,000+ concurrent requests per minute, optimizing database queries and caching to ensure zero downtime.
- Delivered a fully functional system actively used by client for real business operations.
- Fully responsive UI and Production ready Dashboard for client to control this website.
- Here Dashboard live link => <https://dashboard.deluxexdeal.com/>
- Here website live published Link => <https://www.deluxexdeal.com/>

Note: The platform is currently live and being used in production by the client for business operations and generating revenue.

PERSONAL PROJECTS

Ekomart E-commerce

[GitHub](#)

Tech Stack: Reactjs, Expressjs, socket.io, MongoDB, Mongoose, Cloudinary

- Implemented secure **authentication system** with JWT-based login and Google OAuth integration.
- **Developed** admin dashboard for product & inventory management.
- Built complete cart and checkout system supporting both **manual payment and Stripe online payment integration**
- Structured backend using **RESTful APIs with proper route-controller separation and database schema design**.
- **Ensured cross-device compatibility and improved user experience**.
- **Fully responsive and accessible UI components with focus on usability and inclusive design with React.js and Tailwind CSS**.
- Here my portfolio you can see this project => <https://developwithlimon.pages.dev>

CERTIFICATIONS

MERN Stack Development

[Show Certificate](#)

Creative It Institute | Dhaka, Bangladesh

EDUCATION

Kishori Lal Jubilee School & College | Dhaka

Nov 2023 – June 2025

Higher Secondary Certificate (HSC) – Science. GPA: 5.00 / 5.00

LANGUAGES

- **English : Professional Working Proficiency**
- **Bengali (Bangla) : Native**
- **Hindi : Intermediate**
